**RESPONSE TO RESTRICTION REQUIREMENT**

Commissioner for Patents

Sir

In response to the Election of Species Requirement dated June 24, 2005, Applicants hereby elect Group I, containing claims 1-10. Further, Applicants make a provisional election of Species I, associated with Figures 1 and 2, with traverse. Claims 1-5, 7-15, 17 and 18 read on the elected species.

The Examiner indicated Figures 6 and 7 as the Species II. The control flow chart shown in Figure 1 is the first embodiment of the present invention, whereas the control flow chart shown in Figure 6 is the second embodiment. The hybrid mechanism shown in Figure 7 is another embodiment of the hybrid mechanism shown in Figure 1, and the control flow shown in Figure 2 also can be applied to it. Thus, the Examiner's indication in which the Species II is associated with Figures 6 and 7 is inappropriate.

Applicant's believe that an appropriate grouping of species would be:

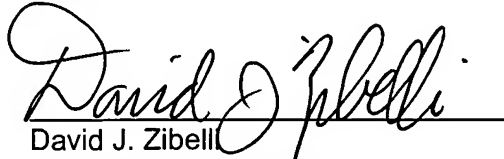

Species 1: Figure 2  
Species 2: Figure 6
